

RAID Level 1

Information

PURPOSE OF THE COURSE

The core rebreather course is designed to train people with either no diving experience or train Open Circuit divers with NO rebreather skills in the safe use and technology of basic Rebreather diving with no decompression, up to 1.2 PpO₂ and to a maximum depth of 20 metres.

Combined with this course you will be required to complete a detailed rebreather Speciality unit specific programme. If are not sure which rebreather you wish to learn on contact your RAID Dive centre to discuss this aspect.

Persons new to diving - this Level provides you with the certification to be able to dive Open Circuit & a RAID rebreather in a safe and concise way and earning you two certifications! This means you have to complete Rebreather Level 1 AND the unit specific rebreather speciality you have chosen to do this course with.

NOTE: This Level may only be taught in combination with the Mk6 Discovery Speciality.

PREREQUISITES

- To be able to swim comfortably.
- To be a minimum of 15 years old or subject to the rebreather speciality programme.
- Completion of Level 1 academic quick quiz and exam
- Completion of a Rebreather Speciality academic quick quiz and exam

Documented proof of prerequisite requirements needs to be presented to the appointed Dive Centre for approval prior to any in water training.

COURSE CONTENT

- On-line e-learning academic presentations, quizzes and exam.
- Confined and open water sessions, with a RAID registered rebreather.
- Complete the skill requirements of your chosen rebreather speciality programme.
- On-line certification.

The student will be required to complete a quick written quiz with the Instructor prior to the commencement of any in water training

IN WATER TRAINING

Your initial training will be in a low-stress environment (pool) for the basic skills. Your instructor will demonstrate each skill for you to practice and master. Your instructor will also ask you to perform a 10 minute float without any equipment and a 200 metre/660 feet swim, with no time limit - just to determine you have basic swimming skills. On mastery of the confined water skills and the rebreather speciality skills, you will then move into the open water for your four qualifying dives. Here you will learn new abilities and explore the underwater world, with your instructor guiding you.

Minimum 6 hours in water required. All skills are under your instructor's guidance and supervision.

CERTIFICATION

To be certified as Level 1 Rebreather diver with open circuit and nitrox, you must have the required logged hours underwater on a RAID registered rebreather.

TRAINING INSTRUCTION

You may register for more than one academic course at a time. After you have completed the practical for this level you can start the next! Certification by a RAID Dive Centre will be on completion and sign off on-line, by yourself and you instructor on all the in water skill training.
